

Project Reference Title

1. Automated application deployment, security analysis and monitoring using AWS Cloud.
2. DevSecOps Pipeline for AWS Infrastructure.
3. Hybrid DevSecOps CI/CD Pipeline for Containerized Web Application.
4. Automated Web Application Deployment Security Analysis and Monitoring.
5. DevinfraX- Automated Hybrid Infrastructure
6. Deployment Of Application Testing Framework Using DevSecOps
7. Sentries: Secure Multi-Region Network Infrastructure
8. SecureFlow Automated CI-CD with security and monitoring
9. End-to-End CI/CD Pipeline and Monitoring for a Kubernetes-Based Application
10. QuantumShield: An End-to-End Secure DevSecOps Pipeline Architecture
11. AIDR [Automatic Incident Detection and Remediation]
12. Autonomous DevSecOps Architecture with Active Threat Mitigation
13. Centralized SOC Monitoring and Automated Incident Response System using OSSIM
14. Secured & Monitored CI/CD Pipeline for Automated Container Deployment
15. Secure CI/CD Pipeline with Real-Time Security Monitoring Using DevSecOps
16. FeedbackHub: CDAC DevSecOps Portal
